

# Demagnetizer DMP

## DEMAGNETIZER

- ✓ Removal of unwanted magnetism.

DMP plate demagnetizers are stable, powerful and convenient devices for occasional use. They are mainly used in tool making.

The pieces are simply guided on the plates by hand.

The components can be collected in a non-magnetic container.

| MODEL                | POLES DIMENSIONS (mm) |     | H   | POWER (W) | Weight (kg) |
|----------------------|-----------------------|-----|-----|-----------|-------------|
|                      | A                     | B   |     |           |             |
| PLATE Demagnetizer 1 | 160                   | 120 | 115 | 300       | 5.5         |
| PLATE Demagnetizer 2 | 220                   | 170 | 122 | 600       | 12          |
