

Demagnetizer DM

DEMAGNETIZERS

- ✓ Removal of unwanted magnetism.

DM panel demagnetizers are high quality, modern equipment with a 100% duty cycle and a unique system that regulates the intensity of the field size and the volume of work, creating low power consumption and high quality of demagnetization.

DM demagnetizers can also be used as under- or overbelt devices. The pieces are guided manually on the plates or via the conveyor belt. The components can be collected in a non-magnetic container.

MODEL	POLES DIMENSIONS (mm)		H	Power (W)	Weight (kg)
	A	B			
Demagnetizer 250x180	250	180	86	350	11
Demagnetizer 281x266	281	266	86	350	14
Demagnetizer 401x306	401	306	86	350	19
