

Rectangular Electromagnets

ELECTROMAGNETS

- ✓ Dimensions:
Length from 100 to 600 mm
Large from 32 to 60 mm
- ✓ Holding Force from 880 to 10.400 N
- ✓ Compact design
- ✓ Different holding systems

This series of rectangular electromagnets are mainly used for handling elements and to ensure the safety of mechanical equipment.

The coil is resin coated (protection class IP65 or IP54). The magnet housing and the outer surface are galvanized. The anchoring can be done through the threaded hole.

MODEL	DIMENSIONS (mm)		M x deep (mm)	Holding Force (N)	Power (W)	Weight (kg)
	BxL	H				
10 31001A1	101,5x32	31	6x10	880	6,5	0,6
