

Magnetic drums for iron separation

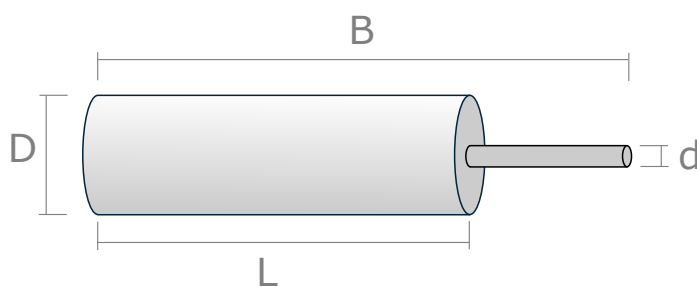

MAGNETIC SEPARATORS

- ✓ Many models ready for use
- ✓ Easy to apply
- ✓ Other models available on request

Magnetic drum separators are widely used in ceramic manufacturing, recycling, plastics processing and many other branches of industry. They are mounted at the end of a conveyor, where they serve to capture unwanted iron components. Devices for separating liquids are built on the basis of magnetic drums.

The acid-resistant steel casing includes a magnetic circuit based on ferrite or neodymium magnets.

MODEL	MATERIAL	DIMENSIONS (mm)			Magnet L (mm)	B (mm)	WEIGHT (kg)	Working Temperature
		D	d	L				
306x900/1250x40 /	Ferrite	306	60	900	700	1250	200	150° C
306x800/1190x60 /	Ferrite	306	60	800	700	1190	200	150° C
